

# CREATE IBM WATSON IOT PLATFORM AND DEVICE

Date:	16 NOVEMBER 2022
Team ID:	PNT2022TMID02488
Project Name:	GAS LEAKAGE MONITORING AND ALERTING SYSTEM FOR INDUSTRIES

IBM Watson IoT Platform

Device Drilldown - 14325

Device Credentials

You registered your device to the organization. Add these credentials to the device to connect it to the platform. After the device is connected, you can navigate to view connection and event details.

Organization ID	kqilpd
Device Type	TestDeviceType
Device ID	14325
Authentication Method	use-token-auth
Authentication Token	B+(jAcRf9STf94AhNi

Authentication tokens are non-recoverable. If you misplace this token, you will need to re-register the device to generate a new authentication token.

Find out how to add these credentials to your device

Connection Information

IBM Watson IoT Platform

General Settings

Here you can see and modify global organization information and locally enable experimental Watson IoT Platform features

PLATFORM

- About
- Identity
- Experimental Features
- Last Event Cache
- Client Connection State API

DATA AND DEVICES

- Custom Device Management Packages
- Device Simulator

SECURITY

- Connection Security

Device Simulator

Simulate devices and device data to get up and running quickly on Watson IoT Platform

Activate Device Simulator

Connection Security

You can use the Connection Security Policy to configure the security level for devices

Open Connection Security Policy

CA Certificates

Upload a CA certificate which is used to authenticate the signature of client-side

Connection Security policy

Add Certificate

Simulations

Import/Export simulation

You can use the simulated event data to learn about, test, and demonstrate fully functioning Watson IoT Platform features. You can simulate a device and its data or simulate only data for a device that is already registered.

To create a device simulation:

1. Select a device type.
2. Configure the event and payload.
3. Add devices.

Create simulation

IBM Watson IoT Platform

## General Settings

Here you can see and modify global organization information and locally enable experimental Watson IoT Platform features.

**PLATFORM**

- About
- Identity
- Experimental Features
- Last Event Cache
- Client Connection State API

**DATA AND DEVICES**

- Custom Device Management Packages
- Device Simulator

**SECURITY**

You currently have no devices.

### Device Simulator

Simulate devices and device data to get up and running quickly on Watson IoT Platform.

Activate Device Simulator ☒

### Connection Security

You can use the Connection Security Policy to configure the security level for device connections.

[Open Connection Security Policy](#)

Device Type: TestDeviceType

Events 1 [New event type](#)

Event type name: event\_1 [Send](#)

Schedule: 20 Every Minute

Payload

Specify the event payload in the editor window or by uploading a CSV file.

```
0 {
1   "temperature": random(0, 100)
2   "humidity": random(0, 100)
3 }
4
5
```

[Upload a CSV file](#) [Cancel](#) [Save](#)

IBM Watson IoT Platform

Browse Action Device Types Interfaces [Add Device](#)

Search by Device ID

Device Simulator ☒

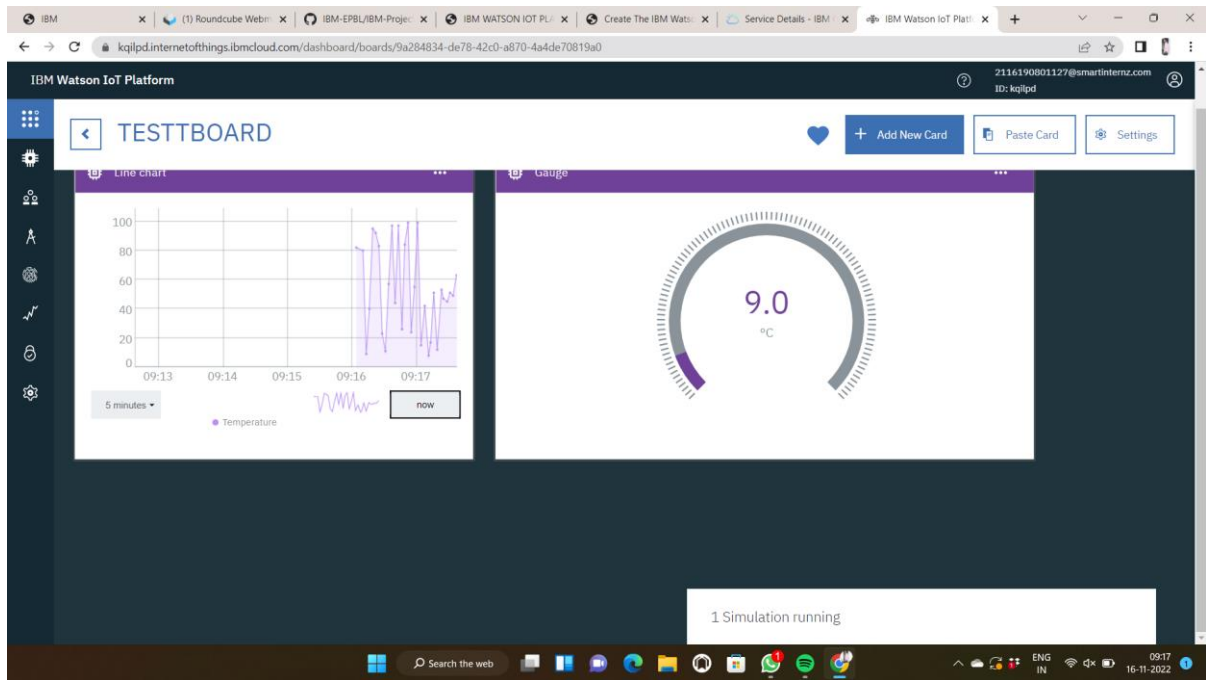

Device ID	Status	Device Type	Class ID	Date Added	Descriptive Location
12345	Disconnected	TestDeviceType	Device	Nov 16, 2022 8:58 AM	

Identity Device Information **Recent Events** State Logs

The recent events listed show the live stream of data that is coming and going from this device.

Event	Value	Format	Last Received
event_1	{"temperature":67,"humidity":79}	json	a few seconds ago
event_1	{"temperature":81,"humidity":21}	json	a few seconds ago
event_1	{"temperature":2,"humidity":79}	json	a few seconds ago
event_1	{"temperature":44,"humidity":8}	json	a few seconds ago
event_1	{"temperature":71,"humidity":6}	json	a few seconds ago

1 Simulation running

### Result:

An IBM Watson cloud for IoT and a device is created successfully.
